SUMMARY

Motivated Computer Science Engineering student with a strong academic background and hands-on project experience. Seeking an entry-level position to apply technical skills, gain real-world exposure, and contribute to innovative software solutions. Eager to learn, adapt quickly, and grow within a dynamic organization.

EDUCATION

M.Tech in Computer Science Engineering | 2025 – Present
APJ Abdul Kalam Technological University

B.Tech in Computer Science Engineering | Graduated 2025
APJ Abdul Kalam Technological University | CGPA: 9.15 | Minor in Mechatronics | Honours in Cyber Security

TECHNICAL SKILLS

- **Programming:** Python, C, Java, SQL
- **Web Technologies:** HTML, CSS, JavaScript, Django, Flask, REST APIs
- **Data & Analytics:** Python, SQL, Excel, Power BI
- **AI / Machine Learning:** PyTorch, CNN, MobileNetV2, Transfer Learning
- **Tools:** Git, GitHub
- **Soft Skills:** Time Management, Teamwork, Diligence, Determination, Honesty

PROJECTS

AURORA – University Digital Twin (Multi-Agent Systems, FastAPI, React)
- Designed a research-oriented computational digital twin of a university that simulates, predicts and explains institutional decisions using multi-agent systems and temporal knowledge graphs.

AI Video Detection System (PyTorch, CNN, Flask)
- Developed an AI-based video classification system using MobileNetV2 transfer learning. Implemented frame extraction, preprocessing, and majority voting to classify videos as Real or Fake.
- Built end-to-end web interface using Flask.
- Trained and evaluated model using CPU.

Customer Shopping Behavior Analysis (Python, SQL, Power BI)
- Conducted end-to-end analysis on 3,900+ retail records using Python, SQL, and Power BI to uncover sales drivers and customer behavior patterns.

QR Code–Based Shopping System (Python, Django)
- Developed a web application that allows users to scan QR codes to add products to their cart and proceed to checkout. Improved shopping efficiency and reduced dependence on manual billing.

To-Do List Mobile Application (HTML, CSS, JavaScript)
- Built a responsive task-management app with add/remove functionality and clean UI for daily productivity.

Motivational Quote Generator Desktop App (Python, Django)
- Created a lightweight desktop application using Django backend and PyWebView to display random motivational quotes with a button-based refresh feature.

Low-Cost Solar Tracker System (LDR, Servo Motor)
- Implemented a hardware mini-project that tracks sunlight direction using LDR sensors and rotates a solar panel using a servo motor to improve energy capture.

INTERNSHIP

- Full Stack Development Internship – Qnayds LLP

CERTIFICATIONS

- Workshop on Web Development – Qnayds LLP
- Artificial Intelligence with Python – Techmaghi
- Introduction to App Development – e-KITES & OFB
- Introduction to Robotics – e-KITES & OFB

- Stack Development – Torc Infotech Pvt. Ltd
- NPTEL: Machine Learning
- NPTEL: Ethical Hacking
- NPTEL: Introduction to Industry 4.0

ADDITIONAL INFORMATION

- Strong academic performance and consistent top performer.
- Communication and leadership skills gained through assisting peers during 11th and 12th grade.
- Passionate about exploring emerging technologies and building real-world applications.
